REASONS FOR ALLOWANCE

1. Claims 16-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art was found to be Tanabe et al (US 5,905,063).
3. Tanabe teaches a remover composition containing a salt of hydrofluoric acid, a metal free base, a water soluble solvent, and water.
4. Tanabe fails to teach or suggest the applicant's specific buffering system. Namely, the prior art fails to teach the buffer as defined by applicant. The applicant's buffering system requires the combination of a weak acid and a protonated base. Tanabe requires the acid to be hydrofluoric acid which fails to meet the applicant's definition of weak base. Furthermore, the prior art fails to teach the applicant's specific molar ratio of base and acid. As such these claims have been found to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
